PROPOSAL & AGREEMENT · REF OSH-GP-2026-01

OshAds Growth Platform

Three engines that bring visitors to your clients' apps and keep them coming back: a recommendation algorithm, a Claude connector with plugin, and a social media agent.

CLIENT
Oshads Media LLC

PREPARED BY
Eshan Saxena, freelance developer

DATE
11 October 2026

FEES
₹1,00,000 development + ₹15,000 agent setup

01 What we are building

ENGINE 1

Recommendation algorithm

- Shows each visitor the client apps most relevant to them
- Learns from interests and browsing history
- Explains every pick ("Matches your interest in Finance")
- Labels paid placements "Sponsored", with a capped boost

ENGINE 2

Claude connector & plugin

- Connects Claude (Pro, Desktop, Code) to OshAds data
- Growth plans, campaign diagnosis, traffic reports on request
- Ready-made commands: growth plan, social calendar, replies
- Read and draft only; no spending or publishing on its own

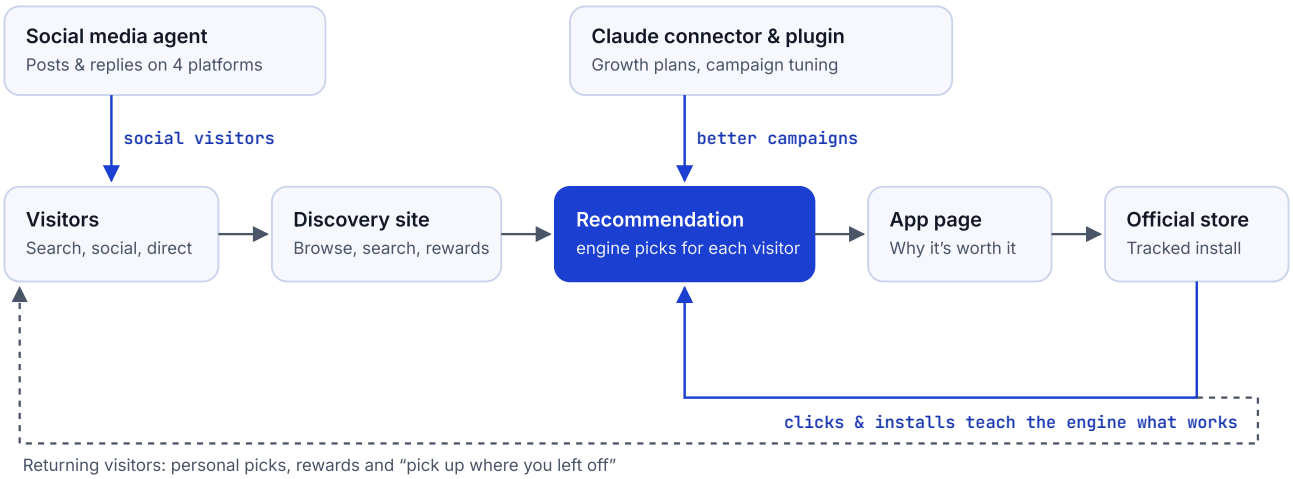

ENGINE 3

Social media agent

- Plans each client's posting calendar
- Writes posts for Instagram, LinkedIn, X and Facebook
- Drafts replies to comments; hands sensitive ones to your team
- Posts at the best times, only after a person approves

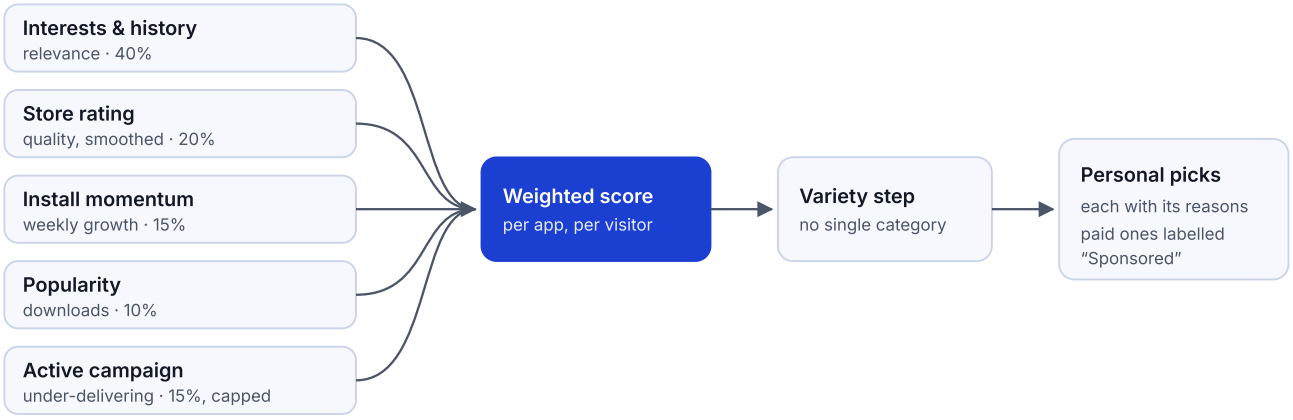

All three sit on the OshAds discovery website and manager dashboard (campaigns, clients, apps, analytics and reports), which is part of this project.

02 How traffic is generated

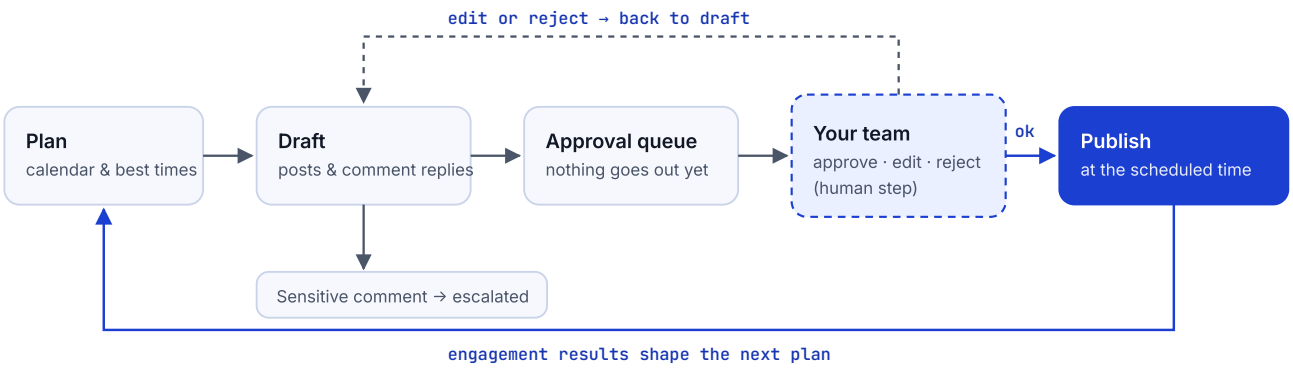

Every campaign adds pages people can find, and every visit makes the next recommendation more relevant, so traffic compounds instead of stopping when ad spend stops.

03 How the recommendation algorithm decides

The campaign boost is capped, so a paying client can gain visibility but can never push an irrelevant app above a strongly relevant one. That protects visitor trust, which protects traffic.

04 How the social media agent works

Complaints, crash reports, privacy or refund questions are never answered by the agent; they go straight to your team. Posts only use facts from each client's app listing.

05 Price list

COMPONENT	AMOUNT (INR)
Discovery website & manager dashboard Public site, campaigns, clients, apps, analytics, reports, roles & login	₹45,000
Recommendation algorithm Personalised, explainable picks with sponsored labelling, used on site and by Claude	₹15,000
Claude connector & plugin Connector for Claude Pro, Desktop and Code; growth-plan, social-calendar and replies commands	₹20,000
Social media agent Calendar planning, post & reply drafting, escalation, approval desk and scheduled publishing	₹20,000
Total development fee	**₹1,00,000**

SEPARATE FROM THE DEVELOPMENT FEE	AMOUNT (INR)
Social media agent setup Connecting the client's social accounts and platform developer apps, brand voice and posting schedule configuration, daily run scheduling and go-live testing	₹15,000
Grand total (development + setup)	**₹1,15,000**

06 Payment schedule

PART 1 · 25% ADVANCE

₹25,000

On signing this agreement, before work starts

PART 2 · 40%

₹40,000

After backend setup is complete

PART 3 · 35%

₹35,000

After deployment, when the platform is live

SOCIAL MEDIA AGENT SETUP · SEPARATE

₹15,000

Charged at the time of setup, in addition to the ₹1,00,000 development fee

07 Terms

1. **Not included in the fee:** hosting, server and database costs. These are paid by the client directly to the chosen providers.
2. **Third-party usage:** Claude API usage by the agent and any social-platform API fees are billed by those providers to the client.
3. **Additional features:** anything outside the scope above is quoted separately according to the work involved, and starts only after written approval.
4. **Maintenance:** updates, fixes and support after handover are chargeable according to the work, on request.
5. **Social media agent setup:** ₹15,000, charged at the time of setup and separate from the development fee. Publishing uses the client's own business accounts and developer approvals from Meta, LinkedIn and X; until setup is complete, approved posts are saved to an outbox.

08 Acceptance

By signing below, both parties agree to the scope, fees and payment terms in this document.
